- Labour saving – plant rooms and field devices visits minimised
- Energy saving – intelligent plant programming towards energy saving.
- Improved reliability – thought preventive maintenance reminders
- Future proof – Based on standards, such Lonworks, Bacnet, Modbus, ActiveX.

### SUPREME COURT

#### Project at a glance

A rather modern complex building with offices, 10 small and 2 large court rooms, library and a general assembly meeting room. The challenge was to design, install and operate an open building management system (BMS) in order to control the HVAC without technical assistance. The use of the friendly micro Net view with LNSDDE software and graphics was the successful solution of this case.

#### HVA major equipment installed

- 120 VAV boxes
- 12 AHUs
- 3 Chillers
- 2 Boilers
- 10 Pumps
- 25 Ex. fans

#### BMS equipment installed

- 120 LonMark VAV controllers
- 30 Micronet DCC controllers.
- 1 MicroNet view software
- 1 Central station (computer, printers)
